FINE CROP WEATHER

The weather continues to be of the best, and there is every prospect of one of the best crops ever harvested in this district.

On Wednesday evening a heavy rain fell in most of the Strathmore district, and showers followed during the night and the next day.

No hail has been reported during the week, and the grasshoppers in the district to the south do not seem to be doing so much damage to the crops there, which are exceptionally fine. The best web worm is causing some damage to gardens, but it apparently does not affect grain, and in the grain fields it eats the weeds, and is therefore in some respect a very beneficial insect.

Farmers are now purchasing their binders, etc., for the harvest. One local dealer informs us that he has already thirty-three signed orders for binders, besides four threshing outfits.

Strathmore Wins Rockyford Tournament

Rockyford Sports on Monday were attended by a large crowd, and a good time was had.

We have not the full details of the baseball tournament, but anyway there was only one game played, Rockyford with Baseball in the afternoon. In the evening Baseball met Strathmore, and a keen game was won by the latter with a score of 5-4.

Scores by innings were:
Strathmore 2 0 2 0 0 0 0 5-4
Baseball 0 0 0 0 1 0 0 0-5

Strathmore team—Nelson, c; Brown, p; Bushman, 1st b; Knight, 2nd b; Thompson, 3rd b; Venus, 4th b; Grier, 5th; Jacobs, 6th; Smith, 7th.

FISK JUBILEE SINGERS ARE AT CHAUTAUQUA

Up from Fisk University, Nashville, Tennessee, come the Fisk Jubilee Singers, the greatest interpreters of the jubilee songs of the southern now doing platform work.

Records of their songs are in thousands of homes worldwide. Now the opportunity is presented to hear these talented artists in person and their sweeter songs on the last day will surely be enjoyed.

It is a rare good fortune which makes them available for the Chautauqua on the closing day. Their coming assures one of the finest programs which the Chautauqua affords. The songs of the southern negro, correctly interpreted by those who know the spirit of them and their rhythm and harmony, have a heart appeal which sustains them at a high point of popularity.

Funeral of John O'Neil Roy Genter's Car Recovered

The funeral of Jack O'Neil, who was killed in an automobile accident near Strathmore on the morning of the 17th was conducted by the local branch of the G.W.V.A. from the funeral home of Graham, McCall and Rattle, at 230 1/2 block. Tuesday afternoon, Captain McCall officiating. The interment was made in the G.W.V.A. plot, and a number of the Strathmore veterans attended.

The Great War Veterans are now trying to locate the deceased man's next of kin. Where he met his death was employed by the C.P.R. as a trackman chieftain. Farther than that the deceased, who served in France with the 10th Battalion, had started on his vacation papers when joining the army, that his next of kin was a brother, P. O'Neil, who was with the United States army, nothing is known of his relatives or friends.

Picked Up Near Chinook

The new Ford Sedan car, taken from Mr. Roy Genter's farm, five miles south of Strathmore, about three weeks ago, was found in Chinook, about a hundred and eighty miles away on July 21st. Lloyd Bywaters was driving it at the time, and was arrested by Constable S. H. Bush, of Youngstown, on a charge of stealing it. Bywaters was brought to Strathmore on Saturday for his preliminary hearing. The case did not come on till after eight p.m. and continued till about half past eleven. Bywaters was represented by Mr. Pascoe, solicitor, Calgary, and Constable Pakenham prosecuted. The case was heard by Justices Lambert and Vickery.

The courtroom was crowded, testifying to the interest felt by the public in the case.

Roy Genter's evidence was to the effect that he noticed the car on July 7th, and did not see it again till the 22nd at Youngstown. He did not hear the car being taken away, nor the driver talking. He did not have a license for the car, and the license number on the car was that of the old car. The car cost \$1150, and was paid for but he had no bill of sale.

Mr. Pascoe, for the defence, at this point asked the witnesses to dis-miss the case, as ownership had not been proved. Genter neither having bill of sale or a license for the car. The objection was, however, over-ruled.

Constable Bush, Alberta Provincial Police, giving evidence, said that while at Chinook, Alberta, on 22nd July he noticed a Ford sedan car bearing license number 592. Previous to this day he had received a circular asking him to look out for a car bearing this number, and that Lloyd Bywaters had been suspected of having taken it. He gave chase in his own car, and got ahead of the suspect car, and then stopped it. Ascertained that the car was owned by Bywaters, and said he had bought the car in Calgary. He had two ladies and two men in the car. He took a car seat and told Bywaters to take his party home, and then placed him under arrest.

The Accused's Evidence

Bywaters claimed to give evidence on his own behalf. He stated that he had received a telegram, (which was read out) from I. Deman, at Chinook, asking him to do some summer (allowing for him). He walked to Austin, late the same evening, with the intention of getting aboard the train there, but found that it had gone. He then met another man, who had also missed the train, and they walked back to Strathmore. The other man's name was Phil Morris. Morris asked him where he could get a car and he said he thought he could get a truck from Roy Genter. They separated at Genter's place, and Morris picked him up at the six mile corner. They went through from Namska to Stand-ard, and thence to Youngstown. Morris said he had some friends to see at Cochrane, but he went past there to Alaska. Asked then thought that there was something wrong, and on the first opportunity he drove the car back to Chinook. He intended to take the car back to Genter. He had not altered the number plate, or the car in any way.

Asked was then cross-examined by Constable Pakenham, on a number of the points in his statement, following which Mr. Pascoe made a plea for the dismissal of the case, and Constable Pakenham asked for a verdict. The Magistrate decided to wound the case to the next court in Calgary. Mr. Pascoe then applied for bail, but it was stated that the application must be made at Calgary on Monday, but that they would make recommendations to that effect.

Bywaters was taken to Calgary on Sunday by Constable Bush.

Farm Sale

Mr. Lewis Utton, who recently purchased the farm of Mr. Van Oerle has now purchased the farm of Mrs. F. M. Dewitt, 2 miles north of Cochrane, at a price of \$70 per acre, in addition half-share of the crop.

As will be seen from our advertising columns, Mrs. Dewitt is offering her household furniture and other articles for private sale.

Langdon and Bow River Exhibition

Langdon and Bow River Agricultural Fair, to be held on August 14th promise to be a great success, a prize list of \$2000 in cash is available for competition besides a great many special prizes kindly donated by influential friends. A large list of entries is contemplated and competition is certain to be keen in the various departments in the vegetable and grain sections, great excitement will be evident as the prizes offered are attractive and the crops in the community are so well matured that the judges will have a difficult task. A special committee has been assigned the task of regulating the sports so that all may have fair play with favors to none in the horse racing and horse sporting contests. Very outstanding prizes are offered. A large number of riders and horses are already equipped.

In the butter-making, fruit preserving and other work, the ladies will find the most valuable prizes ever offered at Langdon and the results will be interesting.

An arena a large place is given to horse and cattle exhibit.

Baseball fans will also find their favorite sport ably supported and together the event promises to be the best ever staged in the district.

Three Weeks to Finish of Phonograph Contest

Less than three weeks remain before the awards will be made in the big phonograph competition promoted by the Rexall Drug Store and the Strathmore Standard.

Which young lady will win the first prize is still a mystery, and the only thing to ensure success is hard and unremitting work. There are still a number of new subscribers to be picked up within the 25 mile radius, and each of these is worth 2500 votes to the girl who gets them. Work yourself and get your friends to work for you.

Owing to the votes being counted late yesterday, we were unable to get them in time for this issue. Following are the names of the young ladies in the competition:

SIGNALER TOM MCNEILL, ARMS SUBCOMMITTEE, WINNING A GREAT RECOGNITION PRIZE during the Chautauqua.

Eighteen BIG EVENTS

JUST ONE GOOD THING AFTER ANOTHER

Chautauqua brings six days of wholesome entertainment, splendid lectures and inspiring music. Eighteen different attractions—all at a price so low as to appear almost unbelievable in these days of "sky the limit" costs. \$3.00 buys a Season Ticket admitting to every program of the week. High school students \$1.50 children's tickets \$1.00. Below are a few of the feature events.

"IT PAYS TO ADVERTISE"

* This great comedy success is to be ably presented on the fourth night by the Keighley New York Players.

- 1 Play Production
- 1 Program of Readings
- 6 Splendid Lectures
- 10 Musical Programs
- 18 "COUNT 'EM"

FISK JUBILEE SINGERS

* Famous quartet from Fisk University, Nashville, Tenn. Rated as the best colored organization on the platform.

TOM SKEYHILL

* Acclaimed by Theodore Roosevelt as the greatest speaker of the war period. Presenting a strong reconstruction lecture.

HON. C. H. FOOTE

* Prominent statesman from New Zealand, member of parliament. One of the best speakers and most brilliant men in the Island Dominion.

FERDINAND FILLION

* Prominent French violinist appears in two recitals on the fifth day, assisted by Gabrielle Claus, dramatic soprano, and Frances Beall, violinist.

BURNELL FORD

* Noted inventor and electrical scientist comes on first night with remarkable demonstration of the wonders of electricity.

OLD FASHIONED GIRLS

* A sterling musical company of four charming and talented girls. Featuring vocally and instrumentally the ballads of long ago.

WARD WATERS TRIO

* Two big programs of music and entertainment on the second day. Headed by Ward Waters, master, impersonator.

Strathmore, Aug 5th to 11th CHAUTAUQUA

Local Notings

OF LOCAL INTEREST

Readers are requested to send in items for this column not later than 12 o'clock Monday noon preceding day of publication. All local news items are recognized by the Standard. Phone 17 or 68.

Messrs. L. Mackinnon and Jimmy Patterson, of Inverness, went down on a trip to Ontario last week. Our informant says that they wanted to get the rain, gathered up and sold a few old mares and went to Ontario on the proceeds, we won't touch for this however.

On the occasion of the impending departure of Mr. and Mrs. Chase and family from Strathmore to the coast, a reception was held for Mrs. and Miss Chase on Thursday at the home of Mrs. Harwood. Mrs. Harwood and Mr. Harwood, as oldtimers in the district, being the hostesses. Tea was served, and a pleasant afternoon spent in music, etc., songs being given by Mrs. Harwood and Mrs. King. Among those present were Messrs. Macdonald, Chapman, Leimann, Penderick, secretary, Probert, Garret, McDonald, H. J. Anderson, King, Holmes, Wright. Regrettably, on account of the departure from Strathmore at the guests of the day, and the tops was expressed that Mrs. Chase's health would benefit by the change of climate.

The departure of the Chase family is generally regretted. They were among the earliest settlers in the district after the opening of the irrigation tract for settlement. After being several years on a farm east of Strathmore, they moved into town, where Mr. Chase has been in business ever since, as general director, etc. They expect to reside in Victoria, but are not quite settled in their plans yet.

Mr. William Nelson has a letter in the Calgary Herald under his signature stating that one day last week he was at the municipal engineering office in Calgary when an order for a farmstead was sent in by a person named Turner in Carleton Place, such a request has to come to Strathmore. Mr. Nelson replied to the effect that this farmer has evidently forgotten that he is living under the protection of the Union Jack and at the very best he is mistaken.

A large number of settlers from the west are arriving in Canada, and the Dutch colony at Strathmore will have several additions shortly, some of the new settlers joining their friends in the district.

An educational picnic and sports were held on the south side of the Bow River last Wednesday afternoon on the grounds of the local school, or at St. Michael's Sunday school. Every one had an enjoyable time. Races were held on the football and games were played, and it was a disappointment to everyone that a prize.

Constance Vale, has been transferred from Strathmore to Crossfield, Manitoba. T. H. Peterson, of Crossfield, has in charge of the local affairs of St. Michael's Sunday school. Every one had an enjoyable time. Races were held on the football and games were played, and it was a disappointment to everyone that a prize.

We do not often make any special appeal for collected help, but we believe it is the duty of the public to give them every opportunity for re-establishment. Two young men, Messrs. Charles West and George Forbes, both formerly successful active agents, have opened a re-establishment shop in Strathmore on First Street. They have some turning the six months' struggle in valiantly and do the support of the Department of the R.C.M.C. which, before opening, they had previous experience in the trade. They are receiving fair assistance from the R.C.M.C. in all its existing business. They are expected to a business which had been somewhat run down, but they are doing good work and giving no cause for any satisfaction, and we trust that everyone in the locality who has any work to do in the way of the repairs will give it a try, as give assistance to men leaving their time with any one else to see that the work is given to the best hands.

Chapman's Gunsmiths can obtain their tools from E. Nelson, Strathmore. As each gunsmith is responsible for his tools, any application is advisable.

Strathmore and Gleichen Masons are holding a joint picnic at the Bow River this afternoon.

Chautauqua Week

NEXT WEEK

Get your growing boy his first pair of long pants for the occasion.

Young Men's Suits in nobby styles at reasonable prices, per suit.

\$22.50 to \$40.00

Boy's Bloomer Suits, per suit

\$10.50 to \$18.00

DOBSON'S

Men's Outfitter, Strathmore

Mr. and Mrs. Dick Jacobs returned Sunday from a fishing trip to Western Lakes.

Mrs. F. E. Lilly returned on Sunday from a visit to her daughter, Mrs. Harold Morris, near Aldrich.

During the heavy storm on Wednesday, two valuable horses were killed by lightning, one on the farm of Mr. D. M. Robinson, and the other on the farm of his son, Mr. Homer Robinson.

Mr. James King is at present staying with his father-in-law, Mr. E. J. Lilly. Since his return from overseas, Mr. King, who was a sergeant in the famous Princess Pals, has not enjoyed good health, and has spent three months in a sanatorium at Kamloops, B.C. After a couple of weeks leave he expects to go to the sanatorium, but being expected to return soldiers at Dorness.

Harding Will Lose No Time In Opening Campaign

Chicago.—Campaign managers for Senator Warren G. Harding, who was made the presidential nominee by the Republican national convention, said they would be hot in getting under way. Harry M. Dugdale, director of Senator Harding's campaign, requested the National committee to take prompt, snappy and energetic action in placing the merits of the Republican issues before the voters of the country. Party managers, it was said, would not wait until Senator Harding and Governor Cochrane are officially elected of their respective offices, but to start the campaign soon after the Democratic convention is held.

The members of the executive committee, of whom seven will be women, will be named without delay. A vice chairman of the executive committee, who will be a woman, will be selected at the time the committee is announced. The resolution passed in the final minutes of the convention focuses a change in the party platform, so that the Republican party from the southern states at future national conventions. The resolution provides that the experiment of having a national convention shall be in proportion to the Republican votes cast in the states.

Republican presidential nominator will become the centre of the campaign of the National Women's party to bring about ratification of the suffrage federal constitution amendment, according to a statement issued by suffrage leaders. A large delegation of women from England, it was announced, will wait upon Senator Harding and ask him to insist upon Republican action to secure the thirty-sixth state ratification.

France's Wonderful Gun

Velocity of 700 Metres a Second May Be Reached

France has a new long-range cannon, which is said to excel Germany's "Big Bertha" and to be capable, when placed at Calais, of knocking London off its pedestal, which stands in Trafalgar square, London. One of the Paris newspapers prints the following description of the cannon, which is an artillery expert: "The cannon barrel is mounted in a certain kind of reservoir, and the lateral grooves of the cannon walls are so disposed as to permit all the burning gas to escape in the rear, which has the effect of creating a reaction against the recoil. This arrangement makes possible a very high pressure from the reservoir to give a tremendous velocity for the shell and a very low recoil. The barrel of the cannon, when the shell is ejected. We obtained an initial velocity of 700 metres a second, and there is no reason to believe that this may be increased tremendously."

Award Inspectors Commission Yearly

Ottawa.—One inspector's commission in the Royal Canadian Mounted Police (Northwest Mounted Police) is to be granted each year to a recruit of the Royal Military College, Kingston. The recipient will be nominated by the commandant of the college subject to the qualifications prescribed by the Mounted Police Act.

Labor Leader Says Republican Platform Is An Outrage

Chicago.—The Republican platform adopted in Chicago is declared "an outrage and an affront to the working people" and "a document with which Wall Street and the steel trusts must be highly pleased," says Matthew Wolf, vice-president of the American Federation of Labor, in a statement made here today. "The platform," Mr. Wolf asserts, "is a smoke screen to deceive the people, but it now remains to be seen whether the people can be deceived by an effort to build and brazen."

"It provides for compulsory labor in all government and non-government services," continues the statement, "but is profoundly and impressively silent on the great industrial issues and gives no hint of a pledge that the United States will police Mexico for the benefit of un-

Can't Compete With Britain

Curtis May Cease to Build Aeroplanes In United States

New York.—The Curtis Aeroplane and Motor Corporation, which has built three-fourths of the entire American aircraft industry, announced here that it would abandon manufacture of commercial planes because of failure of congress to protect the market from dumping of British machines. Manufacture of airplanes, motors and accessories at the Buffalo plant, which was started before July 1, and the factory turned over for the manufacture of other products, it was said.

Fuel Research in Great Britain

Detailed Survey Made of the Qualities of Coal Available

A large and admirably-equipped fuel research station has been established near London, England. It was designed by the Fuel Research Board formed under the department of Scientific and Industrial Research and has been built out of funds provided by the Treasury. Its main object is to carry out large-scale experiments on the low-temperature carbonization of coal with a view to obtaining smokeless solid fuel for domestic and industrial use, gas for power purposes, fuel for the navy and internal combustion engines, and a number of other by-products. Careful arrangements for the collection of coal samples in measurements in every step in the treatment. Plant has also been installed for research into the economic use of peat and the utilization of peat, and the production of fuel alcohol. A detailed survey has been made of the qualities of coal available in Great Britain, and the analysis of the samples of coal used in the experiments has been placed on a scientific basis. Important results are expected to flow from the costly investigations thus set on foot.

Pasture and Forage Crops

Good Advice Furnished By Manitoba Agricultural College

Throughout western Canada there has been a serious shortage of forage crops during the last year. In some districts this shortage dates back even two or three years.

To overcome this there are two classes of crops that may be used. The biennial or perennial must be seeded one year before they are expected to produce. The annual crops may be planted or sown before the same year as sown. If we are to ensure against possible shortage of pasture this summer and fodder next winter, the annual crops are the ones that must be planted. It, therefore, is necessary that every farmer secure the assistance of pasture from the St. Lawrence to the Great Lakes.

Mr. Dunning did not take an attitude of hostility to the plan, but considered that the Hudson Bay Railway was as near completion that nothing should be allowed to stand in the way of finishing the work. The acreage was developing and expanding fast, he said, and if a real good year was harvested this year, a grain blockade would be a serious thing previously known in western Canada.

Record Number Medical Students

A total of 743 students were registered in the medical faculty of McGill University, Montreal, being a record that far exceeds that of any other year in the history of the faculty.

Congregational Meeting and Cafeteria

A large number attended the congregational gathering of the Church last Friday evening. Proceedings opened with the unique feature of a cafeteria supper by which everybody served themselves. There was considerable rush for a time at the counter but it was a "heavily laden" with sandwiches, salads, hot bread, fruit and pies, that everybody was fully supplied. The young ladies of the committee performed their duty splendidly.

The president of the Ladies Aid Society, Mrs. North, gave a splendid report of work done last year and a thriving condition of membership to begin the new year with. Their financial objective is \$500. A resolution was passed at last meeting to assist the official Board in lighting and decorating the church to the extent of \$200. The Superintendent, E. E. Zettie gave a report showing a very successful year in the Sunday School. Emphasis was laid upon the large amount of papers and supplies distributed through the school to the homes. The Secretary, Treasurer presented the financial statement for last year and also the new budget setting forth the objective of \$2500 for this year. Mr. Lait gave a short address appealing strongly for systematic, perseverant and increased financial support. Mr. Bolton spoke briefly touching the continuance of attention and support to the church.

Interpersed through these reports were favored and delightful entertainments by a piano solo from Mrs. Fox and vocal solos from Mrs. Green, Mrs. Todd and Miss S. Miller. Mrs. E. E. Zettie, pleased the audience with two humorous recitations. The hearty

applause given all these numbers showed appreciation. The pastor occupied the chair and took occasion to remark on the extensive scope of the work of the Christian Church and its value to humanity.

Come To The Irrigation Convention

The arrangements for the Fourteenth Annual convention of the Western Canada Irrigation Association, which will be held at Lethbridge, Alta. July 28, 29, and 30, are now practically completed. The convention will undoubtedly be one of the most important in the history of the Association. It is being held in the city that may be called the birthplace of irrigation in Western Canada, for it was at Lethbridge that the first irrigation system in Canada was projected. This city, to the north the centre of the great movement for irrigation extension, is well suited for the scope of an irrigation convention of this time.

The convention opens at 2:30 p.m. sharp on Wednesday, July 28. Individuals are that there will be a large attendance of delegates from the three provinces. The Association extends a hearty welcome to all farmers and others interested in irrigation, whether they have credentials or not, to attend the meetings of the convention and take part in the useful discussions that have been arranged.

We are sorry to hear of the impending departure of Mr. Eric Richards, of Devon House & Pot alone, who has accepted a position with Gills, Brown, and Odell, of Hanna. Mr. Richards has been in town for several years, and has been in great demand as a promoter of amateur concerts and sketchers, in which capacity Mr. Richards had been leading parts.

Baseball Doings

Strathmore 10 — Dalry 0
Strathmore defeated Dalry in a one-sided game on Sunday afternoon. Dalry went up in the first innings, when seven runs were scored, and they never got a real hit through out the game. Dalry had a good pitcher, but the rest of the team was weak. Brown pitched a good game for Strathmore.

Score by innings:
Strathmore 2 0 0 2 0 0 0 0 0 0 0 0
Dalry 0 0 0 0 0 0 0 0 0 0 0 0

Strathmore Team:
Pitcher: Lait; centre field: Brown; pitcher: Knight; 2nd base: Yennie; 3rd base: Van Tiedem; 1st base: Smith; left field: Stashman; short stop: Way; right field: Dalry Team.

Ray, short stop; McLaughlin, centre field; Parks, 2nd base; Corwell 3rd base; McAllister, catcher; Martin, left field; Laidly, left base; Jones, pitcher; Deason, right field.
Umpire—Bert Horton.

Strathmore journey to Rockyford on Thursday for the tournament, but found that the sports had been called off on account of the weather. However not to disappoint the crowd entirely, a game was played with Laidly and, which Strathmore won 5-1. Laidly and Van Tiedem, the two best men of the game in Strathmore both side home from third.

What about a baseball tournament. The public are asking for it. It should be brought off shortly after Chautauque and before harvest.

The Rockyford baseball team played Rockyford on the Rockford diamond last Sunday afternoon, resulting in a score of 12 in favor of Rockyford. Chautauque next week. Have you your ticket yet. Don't miss this.

Speed Up

There appears to be a number of enthusiasts in this town that would like to enter into the motorist race, and it appears from their past record that they are only talking on one cylinder. They may have a little car, but they are not going to be run on the square, and someone is going to be left at the pole.

There is the Tiffin who is better known as the flying Tiffin, who has been known for his great speed in his early days, and from present indications we note that he is not going backwards. No one can outrun the rest of the boys are handicapped owing to the fact the Doctor has an imposing little limousine, and he looks no fear as he drives up the street with his hair beside him, and we hope in the fact that the Doctor will give us one grand ball.

The Judges are ready and the stars are ready and the race has begun. They are off now. Step back and watch the fun. There are various other entries for this race. For instance, Mr. Brown, a world's runner, but from past records we think he is losing ground. But it may be due to the fact that he has been in other towns.

And there is Hapley, with his wobbly legs. I should say he is in it to win. My advice to the rest is to try and do their best to get some miles into the West.

HOW ARE YOU BETTING DOGS?
From The Rockyford Reporter

TOM SKEVILL
FIERY AMZAC FIGHT
Comes to Chautauque on Fifth Night
With Powerful Reconstruction Lecture

Tom Skevill is the fiery young Amzac who raised twenty-three million dollars in twenty-three months in the Metropolitan Opera House in New York during one of America's Liberty Loan campaigns.

He is one of all over one hundred millions for Uncle Sam. It is easy to understand then why Roosevelt called him "the greatest orator the war has produced." Such results could hardly have been achieved otherwise.

This brilliant young soldier-poet will be at Chautauque on the fifth night with a reconstruction lecture of real value and intense interest.

GREATEST COMEDY
IS COMING SOON

"It Pays to Advertise" To Be Given at Chautauque on Fourth Night.

"It Pays to Advertise" the greatest success in the past decade is to be presented at Chautauque on the fourth night by the Reighley New York Players. The presentation of this play is a real departure from the regular line of Chautauque feature attractions and will undoubtedly be welcomed by all Chautauque patrons.

The play itself is clean and wholesome through and through and packed full of fun. It has had sensational runs in the past few years in all metropolitan theatres. The Reighley New York players who will stage this attraction on the fourth night, rank high in dramatic circles. The company is under the personal direction of William Reighley and is an all professional cast.

DR. GEORGE ADAM,
former member of Lloyd George's
Munition Board, coming to Chautauque.

The All American Girls played the Rockyford team on the Rockyford diamond last Sunday evening. A close game was played resulting in a score of 11-10 in favor of the visiting girls.

PROVINCE OF ALBERTA

Help Your Province

6 PER CENT. GOLD BONDS

- By purchasing bonds of the Province of Alberta.
- While securing the highest class of investment procurable you at the same time aid your Province to provide for the building of its Public Works and Telephones in the most effective way.
- Financing by the issue of bonds within the Province results in the distribution of the interest amongst our own people.
- If you encourage this idea, you help your Province to become less dependent on outside money markets.
- Interest is payable half yearly—1st of May and 1st of November—by coupon.
- Bonds are in denomination of \$100, \$500 and \$1,000.
- Remittances should be made by marked cheque, money order or postal note.

Write for fuller information to Deputy Provincial Treasurer.

These Bonds may also be obtained from any recognised Bond House in the Province of Alberta.

Address all communications to DEPUTY PROVINCIAL TREASURER

HON. C. R. MITCHELL, Provincial Treasurer. W. V. NEWSON, Deputy Provincial Treasurer, Parliament Buildings, Edmonton, Alta.

BOY SCOUT NEWS

Young Canada—Be Prepared

Letters to A Patrol Leader

From the Book by the Hon. Roland E. Phillips; Scout Law Number Two

My Dear Scout,
Your patrol seems to have thought of a good many things in connection with a Scout's Honor that I did not mention in my letter, and you will find each time that you even ideas on the different Scout Laws merely touch the skeleton of the question, and that you will only get at the real thing by talking things over with your brother Scouts.

When you tackle the second Scout Law, you will find that you are not confronted with such personal difficulties as you were in the case of the first, and you will find also that the hardest boy to tackle will have some ideas of the meaning of loyalty when he has no idea of the meaning of truth.

Loyalty is loyal to the King and to his Country and as a sign of loyalty he is glad and proud to stand at the altar on the playing of "God Save the King".
You will find that, at the finish of many entertainments, people hurry away from their seats without paying any attention to the playing of "God Save the King". It is up to a Scout, and to an example to the others, and before long things will change for the better through the practice of the second Scout Law.

A Scout is loyal to the King as the representative head of our Country and of the great British Empire; and as Scouts we must not only honor and respect, but also love him, believing that he is earnestly striving for the good of his people, and that he is setting the highest standard of what we mean by "an Englishman."

I asked a Patrol leader once what he meant by loyalty to the Country, and he answered:

"The way to be loyal to the country, is by being a Scout."
That is a splendid answer, because if you are loyal to your Country you want to make her a present, and you can make her no better present than that of a kind, clean, honest, true Boy Scout.

No good Scout will ever speak against his employer, because that is disloyal.

Some chaps manage to raise a laugh among their pals by saying something against their boss or the firm for which they are working. But you will find that in the long run his pals do not think of a chap who speaks against his employer.

A boy who is disloyal to his employer will probably be loyal to his parents, and a boy who is disloyal to his parents, may at any moment become disloyal to his friends.

I remember an office where the manager was a very small man, although he had a good deal of sense. There was a big talking fellow working under him who continually tried to be funny at the expense of his boss.

He used to go about asking the chief clerk, "Why is Mr. — like the definition of a point?" He gave as the answer, "Because he has position and no size." His manager got to hear about this one day and sent for him.

"Well, sir," he said, "I understand that I am similar to the definition of a point, as being a person of position but of no size. In future you will differ from me in this important respect, that you will be a person of size but from hereafter no position."

You will speak to your Scouts very strongly about loyalty to their parents, and the fact that you play the game so well at home a few weeks

A STEAMER TRIP TO VICTORIA, B.C.

The Empress Hotel, Victoria, B. C.

It is a seventy-mile trip to Victoria, a warm-weather holiday, but before the steamer enters Plummer's Pass, a narrow gap between two islands which like a chain, fringe our Pacific seaboard. It is from here onwards that one sees the real beauties of the Coastal Belt of British Columbia, scenery of which one never tires. Here and there on the chain of islands, the vivid green of alders or a pretty and prepossessing farm peeps out from the somber forest of firs. The giant Mount Baker, whose snow-capped cone stands a landmark for 90 miles or more, now on our port beam shines in the glittering sunlight above the rest of the cascades, and we see it all the way as it recedes far distant in the steamer's wake. To our south and east where the land and sea seem to meet in the faint outline of the entrance of Puget Sound on whose shores stand Seattle, and half a dozen American towns. To our south and west, some twenty miles away, the foothills of the mighty Olympic, whose glittering white peaks tower high above the skyline.

The straits, which still bear the name of Juan de Fuca, are full of traffic. Side by side we pass, and dip our flag, too, in passing another of the Canadian Pacific Railway's point strainers, which are towing a big boom of white trees, springing into a little cove to shelter for the night. Another tug flying the Stars and Stripes, with a half a dozen boats behind it on its way from Tacoma to Seward's Bay, tells of big things to north where the building of a new traffic. Side by side we pass, and dip our flag, too, in passing another of the Canadian Pacific Railway's point strainers, which are towing a big boom of white trees, springing into a little cove to shelter for the night. Another tug flying the Stars and Stripes, with a half a dozen boats behind it on its way from Tacoma to Seward's Bay, tells of big things to north where the building of a new traffic.

We have left the sunbathing fishing fleet at the Fraser's mouth, only here and there are great gasoline launches trailing for salmon. On our starboard side, back from the hundred and one little islands, when your parents were in trouble he will make what you say to the boys carry a great deal more weight, especially with those who know you.

The beginning of loyalty to parent is never in any circumstances to say anything against them, either secretly or in public, not to allow anybody else to say anything against them.

I saw a small, ragged patrol leader who had been sent to a night at a headquarters in England. "What you have to do, chap," he said, "is not to let it be said that you were talking to 'em" and he was talking to 'em."

I asked him how you had to talk to 'em, and he answered:

"The way to be loyal to the country, is by being a Scout."

That is a splendid answer, because if you are loyal to your Country you want to make her a present, and you can make her no better present than that of a kind, clean, honest, true Boy Scout.

No good Scout will ever speak against his employer, because that is disloyal.

Some chaps manage to raise a laugh among their pals by saying something against their boss or the firm for which they are working. But you will find that in the long run his pals do not think of a chap who speaks against his employer.

A boy who is disloyal to his employer will probably be loyal to his parents, and a boy who is disloyal to his parents, may at any moment become disloyal to his friends.

I remember an office where the manager was a very small man, although he had a good deal of sense. There was a big talking fellow working under him who continually tried to be funny at the expense of his boss.

He used to go about asking the chief clerk, "Why is Mr. — like the definition of a point?" He gave as the answer, "Because he has position and no size." His manager got to hear about this one day and sent for him.

"Well, sir," he said, "I understand that I am similar to the definition of a point, as being a person of position but of no size. In future you will differ from me in this important respect, that you will be a person of size but from hereafter no position."

You will speak to your Scouts very strongly about loyalty to their parents, and the fact that you play the game so well at home a few weeks

ago when your parents were in trouble he will make what you say to the boys carry a great deal more weight, especially with those who know you.

That is a splendid answer, because if you are loyal to your Country you want to make her a present, and you can make her no better present than that of a kind, clean, honest, true Boy Scout.

C. P. R. Steamer Princess Charlotte lands, shows up the shore line of the Sanich Peninsula and the small town of Sidney. On and on past rocks and islands and the same wonderful scenery.

As the steamer rounds the clear straits, the scenery is full of interest. The point that separates Cordova and Cadboro Bays, a natural park of irregular but perfectly spaced rocks, forms the feature of the island landscape. Oak Bay, Shoal, Port Bay, Ross Bay, the last resting place of the "old timers," are passed in turn. Each with from the remnant of the forest gardens, many a blaze of brilliant green lawn with flowering shrubs, and in the background the chain of hills and peaks.

The straits, which still bear the name of Juan de Fuca, are full of traffic. Side by side we pass, and dip our flag, too, in passing another of the Canadian Pacific Railway's point strainers, which are towing a big boom of white trees, springing into a little cove to shelter for the night. The "In-and-out" Fails Because He Has Little Faith

An obvious moral may be drawn from the present market prospects for hog. It is that the "in-and-out" man, breeding and feeding is usually the man who fails. Look at the facts a little.

Last fall prices for hogs dropped rapidly. Two of the causes for this were condition of export markets and the high price of feed grains. So much American bacon had been purchased by the British Government under war contracts that, in the few months after the armistice, there was an unprecedented glut in Great Britain. In addition, the British people being relieved of the stern necessity of eating a class of bacon to which they had never before been accustomed, refused longer to buy it.

The reduction of hog prices was accelerated by the unprecedented rise in the domestic prices for feeds. Hundreds of hog raisers concluded it would be better to sell at any price than to wait until the winter. The combination of conditions resulted in a rash of hogs to the market. Prices went down naturally, and the winter farmers were selling wildly, buyers were temporarily embarrassed with the stocks they had on hand.

Today, however, things have swung back. Prices have considerably recovered. There is a scarcity of breeders, and the quality of the hogs is better. Young pigs are selling at high prices. Meanwhile the man who "dropped out" because he was "in-and-out" is still on the market today, paying high prices for renewing his breeding stock.

He only had a hunch that he would "be" stayed in the game. He would not so readily have sold his breeding animals. He would have waited a little longer, and he would have been in a position to take full advantage of a rising market.

Every Canadian owes it to himself to see that he does not make the mistake of the "in-and-out" man. He should not so readily have sold his breeding animals. He would have waited a little longer, and he would have been in a position to take full advantage of a rising market.

The Soldier Settlement Board

Three-fold Blessing to Canada From "Back to the Land"

Perhaps the most hopeful of the old provisions in the Soldier Settlement Board, which aims to place the returned man on the land if he can demonstrate a fitness for farming.

That is the third of the three blessings—it converts the sword into that most productive instrument of peace, the ploughshare; it puts on the soldier's eye an eye on the land, and it brings down the cost of living.

It creates a class of contented citizens, whose profitable industry will help to pay off the national debt. In the long run this back-to-the-land policy of the Soldier Settlement Board will probably do more good to Canada than all the other re-establishment schemes together.

Warned by past mischances with gifts to soldiers, for example, the scrip which was distributed after the war, only to fall into the hands of the land sharks, the government has decided the policy of free land only for a much more sensible one, which may be summed up in the words: "Back to the land, and let them who help themselves. To which Chairman Black of the Soldier Settlement Board adds, "and the government will not let an eye on you to see that you don't stumble."

This plan, which has been in operation for two years, is a huge success at the figures. In the spring of this year parliament had voted \$15,000,000 to turn soldiers into farmers, and the government had \$10,000,000 will be required to finance the plan.

One hundred million dollars looks like a lot of money, especially to the old-timer who can remember when a million dollars was only thirty-five million dollars. But scaled to present ideas a hundred millions is not too large an investment in an enterprise which promises such magnificent returns.

Chairman Black naturally views with pride the ocean to ocean activity of an organization which has accomplished such great results in the short period of thirty months. He admits that the soldier who was given thirty-six acres to hatch out, he has had to "spread himself," but the spreading has been a decided success.

Clogged Nostrils Open Breathing Made Easy, Catarrh Cured

New Method Very Successful

It is a new method of treatment, it is a medicated air, and cannot fail to be beneficial. It goes wherever air can go, they reaching all the affected parts. It purifies as by first, gently burning up the germs.

Catarrh is a non-poisonous and healing agent. It therefore acts upon the mucous linings of the throat, nasal passages, and bronchial tubes, destroying all mucus, life, and at the same time builds up all the inflamed parts.

As a cure for Catarrh, Bronchitis, Asthma, La Grippe, as a strengthening for the throat, Catarrh is eminently to be equalled.

It is a guaranteed cure, and is highly endorsed by prominent physicians who use Catarrh in their practice.

Sufficient Catarrh for two months' use price \$1.00 smaller size 50c; at all dealers.

Willow, The Wisp

—BY—
ARCHIE P. MCKISHINIE

Printed by Special Arrangement with Thos. Allen,
Toronto, Ont.

(Continued.)
"He stopped and looked at the dead man's hands on his bosom. Then he glanced at the boy and girl. They stood side by side. Willow's right hand gripped Dorkin's left. Her big eyes were the look of a hurt wild thing. She trembled when Dorkin laid his hand sympathetically upon her shoulder, and her arm went about his brother's neck. But she did not speak. Like the lad, who stood gazing upon the motionless form on the slabs, she felt that she was voiceless. Gently Dorkin drew her away from the outside where a blizzard of golden sunlight lay upon dripping grass and fern. "Look," he said pointing to the barred sides between the rainbows and old Cretaceous, "Daddy passed through yonder."

Dorkin caught his breath as he gazed and his face lit up with a wistful smile. "If we only knew for sure that Dad went through here," he said, "we'd be rich, wouldn't we?" "If Dorkin says he went through," said the girl, "why of course he did." She reached for the big man's hand and guided it to her face. She rested her white cheek against it, and her bosom heaved as she gazed upon the glowing lights beneath the dimming rainbows.

"Daddy," spoke Dorkin gently, "you remember, it was Daddy's wish that his last sleep should be beneath the big oak where the trail divides. It will be as he wished, lad, and he will be happy."

The boy turned with a sigh. "Yes," he faltered, "Dad always liked that old tree. We'd make his grave there. We'd make like to have it there, where the birds quit singing wouldn't we, Willy?"

The girl nodded. "Ah, when it's all buried, I'd make like to play him the tune he loved best on the fiddle," she said chuckling.

She turned towards the cabin, but Dorkin restrained her. "I'll fetch the fiddle, Willy," he said, "you stay out here in the sunlight."

She smiled bravely up into his face. "Whatever you want me to do, I'll do," she said simply.

He left her standing wrapped in the view above Old Creation, and passed into the cabin.

As he looked down on the peaceful face on the slabs, he remembered how Daddy Farney had striven to tell him about the box. He had forgotten all about it. He had been in the east where he had left it. It was gone. A long incision had been cut in the old side of the window close to the corner. Somebody had stolen the box and with it the secret which the old trapper had vainly tried to tell him. For a moment Dorkin stood, his stepped-aside at what had happened, then his mind became active again. What could that box contain? He wondered, something of importance surely, judging from the effort the dead man had made towards its preservation and now he, Dorkin, had been the unwitting agent of its loss. He stood still in the centre of the room, vexed with himself for his carelessness, disgusted with the man

dals who had no respect even for death. He reached for the violin hanging on the wall and went out where Willow still stood gazing at the changing colors above the falls.

"Dorkin," she asked, as she took the violin from his hand and suggested it against her face, "do you suppose there's woods on 'lakes' on rivers on 'lakes' side of them gold bars, 'cross there?"

"I believe there's water Daddy most loved beyond those golden bars, Willow," he answered.

She sighed and the first tears her eyes had known since her bereavement stole down her cheeks.

"Then it's all right," she murmured. "There won't be no more 'lakes' across there, it'll be happy for Daddy."

"Suppose you go up on the knoll and join Daddy," Dorkin suggested. "I'll carry Daddy here, and together we'll lay him where he wanted to be laid."

"Oh, yes," she said—and the heartache in her voice hurt him—"we'll lay him where he wanted to be laid. And then, Dorkin?"

She turned towards him, her face uplifted, her eyes luminous with a light he never understood.

"Then we will all go up to the preserve, Willow; you and Daddy are going to live with us, now."

"Yes, Daddy with me in my cabin, you with LaVerre and his wife in the one close beside it. Are you glad?" smiling at the look of wonder on her face.

"Yes," she said softly, "right glad." Into her was checked the red blood that rushed to her cheeks, and she hid it in a fire in her eyes. He watched her, his heart beating a little quicker than when he turned and walked slowly up the path to the knoll.

When he turned to re-enter the cabin a tall Indian stepped out from between the trees and forest line. "Hew," said the stranger, his eyes fixed on the girl.

"Hew, Sagawa," returned Dorkin, holding out his hand.

The Indian took it, his gleaming black eyes on Dorkin's, his strong face glowing no emotion, as he said: "You are the friend of Sagawa, and to you he will speak, again. When the spring wind calls, Wawa's fire northward to the forest line. When the white wolf howls on the upland, Sagawa hears the voice of a brother in distress. He has come to find the hands that fed him when he was hungry, and plucked him from the castrat when the freshet swooped down upon his herd. Sagawa would know how his friend, the aged trapper, came to his death. Will his brother who says 'come' to the wild things and they follow, tell him?"

He folded his arms across his breast and stood waiting.

"He was shot in the back Sagawa," said Dorkin, sadly. "It happened somewhere down near the rapids. River that runs between the poplars. He crawled to his cabin on his hands and knees. He did not know who shot him."

The Indian lifted his head with a superb gesture. "Look," he cried, holding up his right hand, fingers extended. "Twice as many fingers as you see here are not as many as the fingers I have known on the north, saved my life in the end, the north, when the current carried me down, and an Algonquin never forgets. Three nights ago the white wolf crossed my trail, and when the moon rose above the lake I saw him. His long nose was pointed towards the golden track that threads the tamaracs."

You mean the hardwoods, Sagawa?"

"Yes, the hardwoods," said the Indian. "As I watched him, he lifted his muzzle to the skies and gave the death howl."

He paused and glanced towards the cabin. "Then," he resumed, "I stamped out my cigarette and went to the trail. One night and two days I tramped the forest; then the white wolf flushed before me once again; and all that night I walked the trail and swam the lakes. Now I am here and I find my white brother gone forever. From the hunting field, the more his feet will follow the trails of the forest. The heart of Sagawa is hot with grief and the red mist rises to choke the trails that wind through valley and upland. He must hunt for the slayer of his friend and brother."

Dorkin pointed to the weeping lights above the falls. "Look, Sagawa," he said, "your friend and brother has ridden on the wild horses through the golden bars which Uncle Manitou let down in the sky, yonder."

He would have you join him there, Dorkin. Let there be no stain of blood on the hand he will hold, Sagawa. Fight off the red mist that chokes the trails, grant the first that cry vengeance in your heart. Come with me."

He would have you join him there, Dorkin. Let there be no stain of blood on the hand he will hold, Sagawa. Fight off the red mist that chokes the trails, grant the first that cry vengeance in your heart. Come with me."

No Restrictions Against Trade With Russians

Understood That Several Contracts Have Been Made in Canada

Reading from an article in the Montreal Gazette, Joseph Archambault, Chamby Vercheres, asked the government regarding status of trade between Canada and Soviet Russia.

He quoted the newspaper as stating that C. A. Y. Martens, representative of the Soviet government in the U.S. had said that millions of dollars in contracts for food, machinery and clothing had been closed between Canadians and Soviet Russia.

Mr. Archambault asked if trade had been resumed with Russia, was the government aware of these contracts having been made, and was it a fact that Premier Lloyd George and Gregory Zassins were instrumental in arranging these contracts?

Sir George Foster replied that there were no restrictions against trading with Russians, but Canadians were not given any more facilities there than elsewhere. He knew nothing of the proposed negotiations, but officially it had been stated that considerable contracts had been closed between Canadians and Russians.

Lightning Rods
A Great Protection
Apparatus Should be Examined Frequently for Defects

Warning has been given in an official government document to the owners of premises protected by lightning rods from fire through electric storms, to examine the apparatus for certain kinds of defects which might be overlooked when emergency arises. Lightning rods have proved an almost absolute protection in cases where they have failed it is usually found that the failure was due to defects in installation or to deterioration, which would have been discovered and repaired by systematic inspection. The most frequent defects are broken insulators, or bends in the cable which allow contact with the framework, or corrosion at the point of entry into the earth. The latter, it is pointed out, is a very important thing. The electricity is carried into the ground by means of the cable, but if the cable corrodes and the ground connection is thereby broken, a fire is very liable to result. The cable should be kept in a sound condition at all times, and be placed deep enough in the ground to always be in damp earth. When building wire fences it is advisable to temper with three live rods. Lightning is attracted by wire fencing, and as during a storm animals will congregate near fences, many of them are killed by contact with the wire.—St. Thomas Times-Journal.

Protecting Trees
Winning Records Show That 116,000 Trees Have Been Planted

Winning has passed several extraordinary 12 protect trees. It is an offense for persons other than the owner to cut down trees on private property. Residential sections of Winnipeg are gradually becoming park-like stretches shaded by large trees. The city records show that 116,000 trees have been planted within the city limits, including the parks. Of this number 75,000 are street trees.

The city board, which has jurisdiction over the boulevard, has planted 20,000 trees along the 120 miles of street to be planted, the total cost for the planting being \$26,000. Property owners have been responsible for the planting of 147,000 more trees on the boulevards in front of their residences.

Columbus brought the first cattle to America on his second voyage.

Economy in Use of Paper

A Matter in the Interests of Economy Which Should Engage Attention

The Nation's Business, a magazine published by the chamber of commerce of the United States, in discussing the paper situation, criticizes too loudly against extravagance, and holds that the United States government set the pace for the paper of the Union along the lines of economy in the use of paper. In this connection, the magazine cites the case of a Heliopolis, Montana, editor who received identical publications from the same department of the government under three separate addresses.

The Nation's Business also denounces the practice of using the government printing office for the issue of propaganda for the members of the senate and other departments of the government, quoting one senator to the effect that a Kansas business man of his acquaintance in three days received 165 government publications, and calling for a saving of paper by the United States federal authorities.

This waste of white paper is not peculiar to the United States. The franking privileges allowed the members of parliament and senators in Canada, and the accessibility to them of the government printing office, permits them to flood the Canadian market with printed copies of their own or other politicians' speeches, a majority of the addresses receiving a number of copies of the same publication. This is surely a great waste of white paper, of which there is so serious a shortage at the present time.

Here is a matter in the interests of economy, which should engage the attention of the federal government. When paper is so scarce as it is, perhaps, but some of you will, when every politician in the city will be forced to wear a red electric bulb in his pocket and carry a red lantern swinging to his coat-tails behind."

Motorists and Pedestrians
"The time is not far distant," said an elderly citizen of Toronto, the motorist, "when you will see, perhaps, but some of you will, when every politician in the city will be forced to wear a red electric bulb in his pocket and carry a red lantern swinging to his coat-tails behind."

Old London Not Crowded
Many journals are featuring stories
about the alleged overcrowding of
London, "big" hotels for the
present season. London is certainly full,
but information is that with the
exception of the swagging places, there
is room for the less ambitious
visitors, while flats are rentable for
a year and are actually cheaper than
well-known Canadian traffic managers
say real tourists are not as numerous
as expected, the majority of the
visitors having definite business other
than mere sight-seeing.

The Umpire
"I guess I must be the umpire in
my family."
"What makes you think so?"
"Because all my decisions are hunt-
ed at."

Mother Graves' Worm Exterminator
will drive worms from the system
without injury to the child. No
cause its action, with fully effective

World's Largest Motor Ship
At Copenhagen recently was launched
the world's largest motor ship, which
having a length of more than 464 feet
and a deadweight capacity of 12,570
tons.

The Europeans cannot afford to go
on buying food for which they cannot
pay, no more can they afford to support
their own fields, where they have
the means of self-sufficiency. The
French expect to harvest almost enough
wheat this summer for their needs in
the year ahead. The British are busily
restoring the exports that assure them
their wheat from Canada, Australia and
South America.

The people of Austria and certain
other sections of middle Europe will
remain in need, for a time, of the
wheat that they have lost the means
to buy. But the problem of feeding
them should diminish little by little.
—New York Evening Star.

Wheat Prospects
The Europeans cannot afford to go
on buying food for which they cannot
pay, no more can they afford to support
their own fields, where they have
the means of self-sufficiency. The
French expect to harvest almost enough
wheat this summer for their needs in
the year ahead. The British are busily
restoring the exports that assure them
their wheat from Canada, Australia and
South America.

The people of Austria and certain
other sections of middle Europe will
remain in need, for a time, of the
wheat that they have lost the means
to buy. But the problem of feeding
them should diminish little by little.

Painting the Town

Santiago is Described As A Chaotic
Jumble of Pigmies

All Cuban cities offer a motley
tint, says the Century Magazine, but
Santiago outdoes them in the
chaotic jumble of pigment. In a
single block we found houses of
lavender, sea green, robin's egg
maize yellow, sky grey, deep
imperial pink, old rose, light pink,
yellow ochre, maroon, tan, vermilion
and purple. This jumble of
colors, with never two shades of the
same degree, gave the city a kalei-
doscopic brilliancy under the tropical
sun, that is equally entrancing and
trying to the eye.

Some Sold to Speculators

Will Make a Fat Killing at the Ex-
pense of Farmers

The estimate is made that the pro-
vince of Saskatchewan will secure
\$32,000,000 more for 1919 wheat from
the cashing of the participation cer-
tificates at 40c a bushel. Taking wheat
at Canada as a whole, the increased
return will probably be between \$60-
000,000 and \$70,000,000. It is when we
have reason to ask to be delivered
from their "Friends" — Edmonton
Journal.

SAY "DIAMOND DYES"
Don't spray, or rub your material in a
dry box. Insist on "Diamond Dyes"
dry directions in package.

"CORN"

Lift Right Off Without Pain

Doesn't hurt a bit! Drop a little
"Diamond" on an angry corn, and
it will lift right off without pain.
Don't scrub, or rub your material in a
dry box. Insist on "Diamond Dyes"
dry directions in package.

Your druggist sells a little bottle of
"Diamond" corn ointment. It will
remove every hard corn, callus, or
corn between the toes, and the
corns, without surgery or irritation.

Boys' Club Director

Work Hitherto Carried on by Ex-
tension Department

The Boys' and Girls' Club work,
hitherto carried on by the extension
department of the University of Sas-
katchewan in co-operation with the
provincial department of agriculture
has been taken over by the director
of education and will be carried
on in future under the school agricul-
tural branch of this department. The
department has just secured the ser-
vices of Mr. Harry Saxby, who has
been appointed assistant in school
agriculture for Boys' and Girls' Club
work. Mr. Saxby is a graduate of the
University of Saskatchewan, ob-
taining the degree of B.S.A. in 1916.
Mr. F. W. Bates is director of Rural
Education and School Fairs for Sas-
katchewan.

Asthma No Longer Dreaded—The
dread of renewed attacks of asthma
has no hold upon those who have
learned to use Dr. J. C. Keen's
Asthma Remedy. So safe do they
feel that it will always do them
good that they are not afraid to use
it again and again. If you have not
yet learned how safe it is with
this preparation at hand get it to-
day and know for yourself.

Nitric Acid from the Air
Plant in England

Private Company Will Take Over
Plant in England

In Great Britain it was found to produce
in large quantities of ammonia and
nitric acid made with the aid of the
nitrogen from the air. A large fac-
tory for this production began during
the war by the government at Bill-
ingham, Essex, and Shroton, which
completely closed. It will now be
transferred to private interests for op-
eration. This is the first factory estab-
lished in England for the production
of ammonia by this process, which was
invented by the Germans, and has
since been improved upon by the re-
search chemists attached to the staff
of the Ministry of Munitions.

The company which will take over
the factory will endeavor the nation
for the money already spent and will
invest new capital. The whole trans-
action represents an investment of
between \$200,000 and \$250,000.

The River Oxus in Central Asia
is supposed to have changed its course
in the year 1000 and to have
remained in its old bed in 1875.

High-hour Day on Farm
Farm work is not regulated by the
dawning of a white light. It is govern-
ed by the sun and the rain and the
wind. An eight-hour day works well
in most industries, but it is not fea-
sible in agriculture where the weather
is so uncertain. "Never put off till tomorrow
what you can do today," is still a vital
precept—Toronto Telegram.

TO SAFEGUARD
YOUR DIGESTION

The Blood Should Constantly be
Kept Rich and Pure

If you suffer from any form of in-
digestion, your diet should be thor-
oughly changed. Over-eating is always
harmful, but at the same time meat
must be taken enough to supply the
needs of the blood. It must be re-
membered that the blood has to carry
nourishment to every part of the
body, fuel for energy and defence
against its enemies, as well as
regular pulse for digestion. Hence,
when the blood becomes weak and
fails to do its work, indigestion
ensues, also when digestion light-
ens the blood still further suffers. There-
fore, to keep your digestion in good
condition, the blood must be kept rich
and pure, and this can best be done
by taking a course of Dr. Williams' Pink
Pills. These pills are a blood-building,
corrective tonic, and through their
use your digestive system will
respond naturally, your appetite will
improve and your food will do you
good. The value of Dr. Williams' Pink
Pills in curing stomach troubles is
shown by the experience of Mrs. J. A. Williams, of Denver, Colo.,
who says: "Some years ago I was
in a terribly broken-down condition,
and had indications of liver trouble,
and sharp pains of agony all
through my abdomen. I was so weak
that it was difficult to retain food,
and often after eating I would
have vomited my food. I had no
medical treatment, but as I did not
improve my own state in a terrible
condition and I was always in such
a state of fear that I was afraid
that I was going to die. I was so
weak that it was difficult to retain
food, and often after eating I would
have vomited my food. I had no
medical treatment, but as I did not
improve my own state in a terrible
condition and I was always in such
a state of fear that I was afraid
that I was going to die. I was so
weak that it was difficult to retain
food, and often after eating I would
have vomited my food. I had no
medical treatment, but as I did not
improve my own state in a terrible
condition and I was always in such
a state of fear that I was afraid
that I was going to die. I was so
weak that it was difficult to retain
food, and often after eating I would
have vomited my food. I had no
medical treatment, but as I did not
improve my own state in a terrible
condition and I was always in such
a state of fear that I was afraid
that I was going to die. I was so
